

Operation and Maintenance

Maintenance

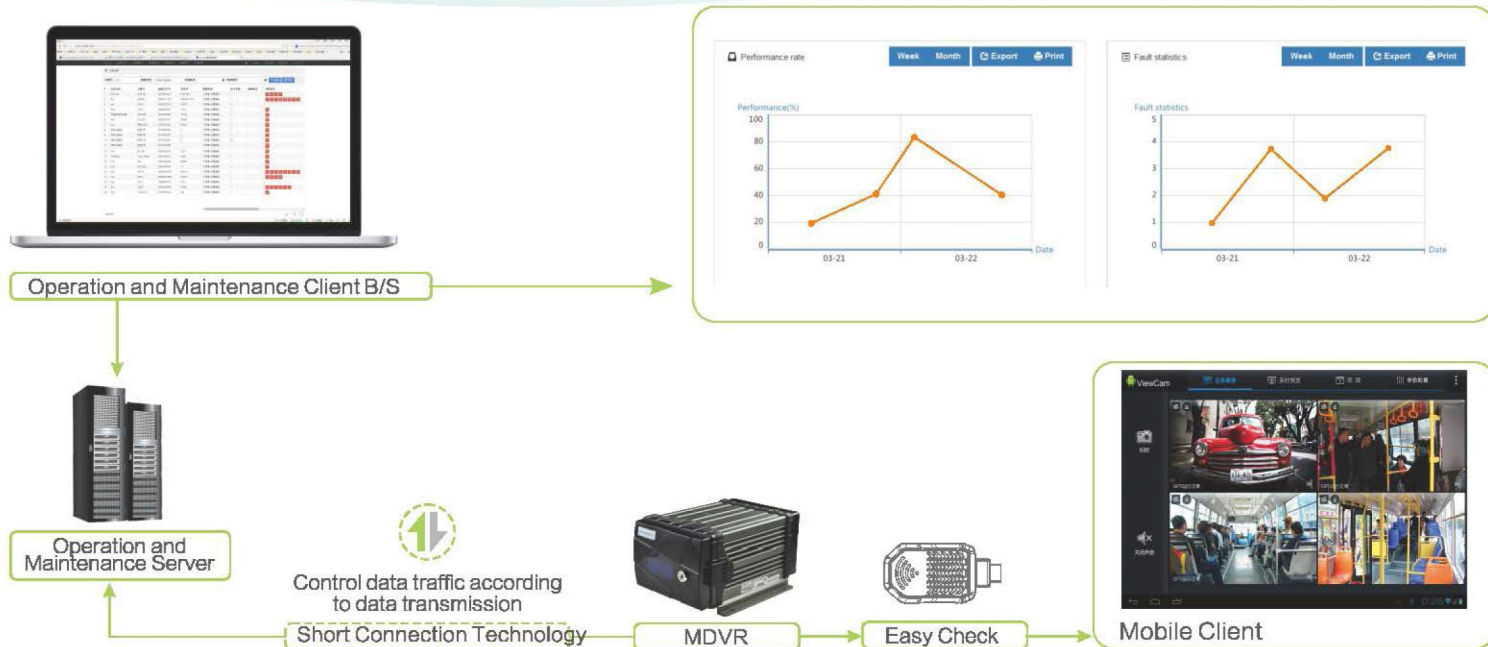

Challenges

- Hard to upgrade Software
- Device parameter have to be set one by one
- Late response to fault dealing
- Lots of time needed to check the device fault

Solutions

- Batch upgrade at one time
- Batch data configuration and check report later
- Overall device status checking
- Work efficiency can be improved

Software Crocus-Operation and Maintenance Solution

Fault Upload and Report

#	Group	Plate number	Serial No.	Device ID	Fault type

Video Error Report

Advantages of Easy Check

Previous Maintenance Method

At least 2 or more staff for maintenance because of the long distance among remote control, screen, device and camera.

Present Maintenance Method

Easy Check+Phone=Convenience
